

FREEDOM | Joe Rogan

Aug 25, 2021

As soon as you give politicians power. Any kind of power that didn't exist previously. If they can figure out a way to force you into carrying something, that lets you enter businesses, or lets you do this, or lets businesses open. historically they are not going to give that power up. They find new reasons to use it. We have to protect those freedoms at all costs, whether you agree with people's choices or not, because it is the foundation that this country was founded on. Freedom. this idea of freedom; there's so many people that think it's frivolous, It's not important, it's not the main thing that we should be focused on, but it is the literal structure that allows this country to be so freaking amazing. Every single country that's ever existed other than the United States, up until 1776, every freaking country that has ever existed, was run by dictators. All of them. This is the first experiment in self-government that actually worked. And it created the greatest superpower the worlds ever known. It created the greatest cultural machine, the greatest machine of art, and creativity, and innovation. Right freaking here. And how did it do that? It did it through freedom. And as soon as you see something, anything, that comes along and inhibits your freedom. You should be very cautious, should be very suspicious, because anything that comes along that can inhibit your freedom is by definition anti-American.
